# MD. Shuvo Miah

## Software Engineer

I am a skilled software engineer specializing in JavaScript and its ecosystem, with deep expertise in frameworks. I am recognized for delivering robust, high-quality solutions, whether working independently or in collaborative team environments. Passionate about advancing my skills, I stay engaged with the latest trends and developments in JavaScript and its frameworks. I am seeking opportunities with an innovative organization where I can leverage my expertise in JavaScript to contribute to impactful projects and drive technical excellence.

## Experience

**May 2022 - Present**
Excel IT AI l Aftabnagar, Dhaka
**Software Engineer**

I held the position of Software Engineer at Excel IT AI, where I contributed to diverse projects both independently and collaboratively, taking on team leadership responsibilities for select initiatives. My role involved utilizing a range of technologies, including JavaScript, React, Next.js, Redux, HTML, CSS, Bootstrap, Tailwind CSS, npm, REST APIs, Node.js, Express.js, MongoDB, MySQL, Postman, Git, and cPanel.

## Projects

**Bppshop:**
Link: https://bppshop.com.bd
Tolls: React.js, Laravel, MySql
- BPPShop is a multivendor eCommerce platform that allows independent vendors to set up mini-stores within its site to sell products directly to consumers, manage inventory, and engage with customers.

**Bppshop Agent Panel:**
Link: https://agent.bppshop.com.bd
Tolls: React.js, Laravel, MySql
- The BPPShop Agent Panel is a specialized admin dashboard designed for managing the operations of a multivendor eCommerce platform.

**Parcelstar:**
Link: https://parcelstar.com.bd
Tolls: Html, CSS, Javascript, PHP, MySql
- A website for courier company like Parcel Star involves focusing on functionality, user experience, and the services that set the company apart in the logistics and delivery market.

**VelocitaInfosys:**
Link: https://velocitainfosys.com
Tolls: Next.js, Express.js, Mongodb
- Velocita Infosys Limited is an international call center service provider, offering customer relationship management, technical support, and back-office services to enhance global business efficiencies.

**Munshiganj Land Project:**
Link: https://munshiganj.excelitportfolio.com
Tolls: React.js, Laravel, MySql
- For real estate developers involved in projects like Munshiganj Land Project, a comprehensive software solution is crucial for efficient project management, customer management, and enhanced customer satisfaction. This software should support everything from project planning to execution, sales, and post-sales services.
